The University of Tasmania has recently re-confirmed its position as one of Australia’s best universities in a wide range of disciplines, as ranked by the internationally recognised QS World University Rankings for 2015.

The international ratings agency evaluates more than 3000 universities for academic reputation, employer reputation and research impact.

We help you become who you want to be

Our University provides both pre-service and in-service degree studies for teachers.
Who Studies Education and Teaching?
Education and Teaching students tend to have wide interests and very personal passions.

The common link they all share is an underlying desire to be a positive influence on their students’ lives and their social, emotional, physical and cognitive development. Very often inquisitive and attentive, many of our graduates are attracted to teaching’s collaborative and collegiate environment and the central role teachers play in a community.

You will need a reasoned and critical perspective. You also need to be personally resilient and committed to your own lifelong learning and education. During the course, you’ll develop the ability to focus on planning and establishing a positive and supportive learning environment. You’ll also learn effective communication, student learning, motivation and engagement.

Professional recognition
Graduates will be qualified to teach in public and private sector schools in all states and territories of Australia, being eligible for teacher registration with state teacher registration boards. In Tasmania, this will be with the Tasmanian Teachers Registration Board. Our education degrees are internationally recognised for their professional training.

Career opportunities with a teaching degree
Our wide range of Education and Teaching degrees provide a broad spread of experiences and workplace competencies. Specialist studies can focus your career even more. A few career possibilities include:
- Coaching
- Childcare Centre management
- Communications
- Early childhood teacher
- Health and Physical Education teacher (primary or secondary)
- Industry training roles
- Online teaching
- Personal trainer
- Primary teacher (Public or Private)
- Secondary teacher (Public or Private)
- Sport and recreation leadership
- TAFE/Applied learning teacher
- Teacher’s aide
- Training roles (e.g. Defence, emergency and law enforcement)
- Wilderness adventure leader

Your study opportunities
To launch your career as a teacher, you must complete a four year bachelor degree in education, or a three year bachelor degree and two year Master of Teaching.

If you want to pursue a passion or want more specialist knowledge and expertise in a chosen field, a degree with honours can give you fascinating career opportunities.

Studying a particular area of interest can focus your learning, research and communication skills.

A single degree in an education subject usually takes four years and requires the successful completion of introductory, intermediate and advanced level units.

Double or Combined degrees
Double degrees offer exactly that; a double degree merges the core requirements of two different degrees. This lets you graduate with the equivalent of two degrees faster than it would take to do two separate degrees. Double degrees can give you greater depth in more than one area and more career options. If you are academically capable and want to challenge yourself, a double degree is an ideal way to get the most from your time at university.

However, the Bachelor of Education is only offered as a single degree focusing solely on its core study area.

Honours
We offer Honours in year 4 of a Bachelor of Education meaning you can start your career in your specialist area.

It can also lead to postgraduate study and a career in educational research or academia.

Alternative entry pathway
If you don’t have the prerequisites for direct entry into an Education or Teaching degree, an alternative entry pathway helps you get the qualifications you need to get into the course you want.

Bachelor of General Studies – Education Pathway
The Bachelor of General Studies – Education Pathway is the first year of the Bachelor of General Studies and is designed as an alternative entry pathway to Education degree courses.

In the first (foundation) year, students study units which provide the skills and knowledge related to their further study in Education and are provided with additional support to maximise their chances of success. As students also study two first-year units from the Faculty of Education, they will receive credit towards their Bachelor degree.

Professional Experience placements
All students who enrol in a Bachelor of Education degree must undertake Professional Experience placements. You’ll need to do these in a variety of educational settings, full-time, for a number of weeks each year (up to 90 days in total depending on the degree). These placements are designed to enable pre-service teachers to become familiar with the child care and education context.

The learning experience at the University of Tasmania goes beyond lectures and tutorials.

Study Abroad
Education have a specific international exchange program set up with Malmo University, Stockholm University, University College Copenhagen, Butler University, Memorial University Newfoundland and the German Sports University. These partner institutes are used for Education exchange because their curriculum and teaching is closely aligned with our University, and therefore there are credit transfer arrangements available for students.

Study Abroad Scholarships
The University actively encourages our students to extend their learning opportunities by undertaking international study exchange. To facilitate this, we offer a range of scholarships and financial assistance.

More info at utas.edu.au/education/international/international-student-exchange

Study Abroad Scholarships

Professional Experience placements
All students who enrol in a Bachelor of Education degree must undertake Professional Experience placements. You’ll need to do these in a variety of educational settings, full-time, for a number of weeks each year (up to 90 days in total depending on the degree). These placements are designed to enable pre-service teachers to become familiar with the child care and education context.

Your study experience
Your placement will involve active observation, participation and engagement in teaching and learning activities. You will be supervised and managed by a tertiary qualified educator (your Colleague Teacher).

You’ll be assessed against focus areas within the Australian Teaching standards. If you’re studying for the Adult and Applied Learning degree, you’ll also be expected to volunteer in a VET setting for the equivalent of one day per week, during semester time. This will ensure you are better able to put theory into practice.

Many students go onto further employment with their placement providers.

Online study
Online learning and teaching make it easier to get your teaching degree. They allow you to study without being on campus, at your own speed, and are suited to different learning and teaching styles.

At our University, the e-Learning Support Unit provides many online programs and units that are equivalent to those available face-to-face.

Where available, you’ll be able to enrol in both on-campus and online units within the same semester.

All units in Bachelor of Education (Primary), Bachelor of Education (Early Childhood), are available fully online.

For the Bachelor of Education (Health and Physical Education), Bachelor of General Studies (Education Pathway) some units are available online.

Additional learning resources
We want to help you get the most from your time with us.

You’ll be taught by subject matter experts. These are people who are passionate about what they teach. They’ll encourage you to share questions and perspectives, inside lectures and outside the classroom.

Our administration team are available to discuss unit choices, degree planning, credit and advanced standing. Dedicated Student Advisers are also available for advice, support and assistance with academic studies or things affecting your personal wellbeing or circumstances.

We also provide online tutorials to help with your research assignments and develop your skills faster.

An Education degree is typically a four year degree. We also offer part time, face-to-face, online and mixed mode study options. There is a range of units available over the spring break.

Scholarships
Each year, the University offers more than 900 awards, across all academic areas.

The awards are based on merit and equity and reward excellence and improve access for new or continuing students. Application details and selection criteria for each award are clearly noted for each award on our website and within the online application.

The role and commitment of teachers has never been more important.
### Course Information

#### Education and Teaching

Education and Teaching degrees at the University of Tasmania cover both school-based teaching and other teaching careers. If you have a passion or desire to teach, you'll find a course to help you qualify. Our students range from school leavers to students of a mature age looking for a career change. Whatever your background we can help you obtain the only formal qualification for teachers.

Some courses are ‘pre-service’. Pre-service simply means you’ve not taught or been employed as a teacher.

This course will give you the skills and confidence to teach children from birth to age 8. It focuses on teaching in professional settings like Early Childhood Centres and Kindergartens.

You'll learn about the technical and cultural aspects of teaching. You'll study the various subjects you’ll be teaching, including English, Mathematics, Art and Music. The course also provides insights into childhood development and learning.

You will also be required to undertake a number of Professional Experience placements totalling 90 days. The course is for pre-service and in-service early childhood professionals and is recognised in all Australian states and territories.

This course has been designed to produce teachers who can inspire people to be healthy for life. On graduation, you’ll be qualified to teach Health and Physical Education in primary and secondary schools (in both public and private sectors) Australia-wide and internationally. The course focuses on the many dimensions of health and wellbeing – physical, mental, emotional, social, environmental and spiritual.

The degree offers a wide range of experiences. You’ll discover how to learn, lead, plan, teach, and research aspects of health and physical education. You’ll learn about the technical and cultural aspects of teaching. And you’ll have the chance to specialise in aspects of health and physical activity, anatomy and physiology, fitness and movement, nutrition, coaching and more.

You will also be required to undertake a number of Professional Experience placements totalling 80 days.

This pre-service program prepares you for roles in Primary teaching, from Prep to Year 6. It is accredited through the Tasmanian Teachers Registration Board, and is recognised in all other states and territories.

During the program, you will study core theoretical aspects and evidence-based practice. You will also investigate childhood development and behaviour, and study the various subjects you’ll be teaching. You’ll focus on literacy learning, including speaking, listening, reading and writing, while also learning other subjects, such as Mathematics, Science, Art and Music, and Health and Physical Education.

You will also be required to undertake a number of Professional Experience placements totalling 80 days. The course content and practical experience provides theoretical and practical opportunities to practice what is learned in a safe and supportive environment.

This non-teaching qualification prepares you for a range of professional instruction roles. You’ll gain the qualification needed for a career in sport, physical activity, leisure, personal training, sports management, wilderness or outdoor recreation.

You’ll learn how to promote healthy lifestyles and physical fitness. You’ll have the opportunity to pursue an additional area of interest through a large range of electives and minors. These include occupations like personal trainer, fitness leader, coaching, business management, human resources and marketing.

Please note: this degree does not qualify graduates as Health and Physical Education teachers. To become a Health and Physical Education teacher please consider the Bachelor of Education (Health and Physical Education).

This two-year course is designed to give you an educational qualification for careers other than teaching of students. You’ll learn aspects of education theory and practice and be able to effectively teach literacy, numeracy and other general education subjects.

It is ideal for people currently employed as a Teacher Aide or Integration Aide (in either a paid or voluntary capacity) or school support officer.

Graduates will be highly sought in education careers other than teaching, in particular in a classroom setting as Integration Aides, Teacher Aides, and School Support Officers. Graduates will also be highly sought after in the industry training sector, and will be suited to communication-based jobs, public relations and other sectors that value graduates with well-developed problem-solving, communication and critical thinking skills.

If you have a trade or a specialist skill, this course will help develop your teaching practices and professionalism. This course offers experienced tradesmen and women a professionally accredited pathway towards teaching careers in the school or VET sector. Graduates from this course will be highly sought as teachers in TAFE's, private RTO's, as trainers in the Defence Force and more. They will also be qualified to teach in private, public and independent schools throughout Australia. This course provides credit and advanced standing for students with current, relevant vocational qualifications and experience, potentially reducing the length of the course. You will also be required to undertake a number of Professional Experience placement totalling 80 days.

When you commence study with the University of Tasmania in a Commonwealth supported place (CSP), you must contribute towards the cost of your tuition. The amount you pay depends on which units you study and the payment method you choose.

Student contribution amounts and rules

To be eligible for a CSP you must be an Australian citizen, a New Zealand citizen or hold an Australian Permanent Resident Visa. The student contribution is calculated based on the units of study that you enrol in. Each unit is assigned to a 'band' according to the subject area it comes from. The 'band' tells us how much to charge for one Equivalent Full-time Student Load (EFTSL), equivalent to 100 credit points, or 100% load.

Most units at the University of Tasmania are 12.5 credit points (0.125 EFTSL), so to calculate the cost of a unit we multiply the contribution amount for that designated band by 0.125. For example, the student contribution amount for a 12.5 credit point unit Nursing unit of study would be $6152 * 0.125 = $769.00.

A typical four-year degree is made up of 32 units.

HECS-HELP

The majority of university students across Australia choose to defer their student contribution until after they have commenced in the workforce. You can do this by taking out a HECS-HELP loan. HECS-HELP is available to eligible students enrolled in a CSP. This loan can cover all or part of the student contribution amount. You are eligible for HECS-HELP if you are a Commonwealth supported student and an Australian citizen or the holder of a Permanent Humanitarian Visa.

Under this option, the Commonwealth Government pays the loan amount directly to the University of Tasmania. Then, when your salary reaches the minimum repayment threshold, you will make compulsory repayments through the tax system.

*The student contribution amounts for mathematics, statistics and science are subject to passage of the Higher Education Support Amendment (Student Contribution Amounts and Other Measures) Bill 2012.

1. For pre-2010 students, the maximum annual student contribution amount that may be charged for Education and Nursing units is $4998.
2. From 1 January 2010, the maximum annual student contribution amount for commencing Commonwealth supported students undertaking Education and Nursing units of study has been increased from the ‘national priority’ rate to the Band 1 rate.
3. The increased maximum annual student contribution amounts affect only students who commence their course of study at a higher education provider on or after 1 January 2010.
4. If you are a mathematics, science, education, nursing or midwifery graduate you may be eligible for a HECS-HELP Benefit.

Other costs

Students are required to pay a student services and amenities fee (SSAF). In 2015, the fee is around $340 for a full-time undergraduate student.

Part-time students are charged on a pro-rata of study load undertaken. Students who are unable to pay the fee up-front can defer all or part of the fee through an element of the Higher Education Loan Program, known as SA-HELP.

The fee contributes to funding student services such as legal and health services, counselling, and sport and recreation activities.

You will also need to cover costs such as textbooks, materials, art supplies or software for your course. These costs can vary from course to course.

Accommodation and general living expenses will also vary depending on your chosen living arrangements.

To learn more about accommodation options, visit utas.edu.au/accommodation
How to apply

Applications should be made directly to the University of Tasmania, depending on your course and when you want to commence.

Year 12 applicants
For Year 12 students, applications for Semester 1 should be submitted electronically via the University’s online application process.

The ‘timely’ application period opens in August and closes in the last week of September. Late applications will be accepted by the University, but some programs that have special requirements and will not accept late applications.

Changing your preference
You can change your original ‘timely’ application course preferences during the Change of Preference period in December. This allows you to modify your course selection depending on your results from your final examinations.

Learn more by visiting utas.edu.au/apply

Non-school leaver (mature aged) applicants
If you are not a Year 12 student, you apply directly to the University via the online application process. As a non-year 12 student your application will be considered on a broad range of factors, including previous studies, work experience and any extra requirements specified for the course.

For entry into an undergraduate degree, at least one of the following must be completed:
- Year 12
- Certificate IV, diploma or advanced diploma and/or
- Successful completion of a University enabling program
- Personal competency statement demonstrating how work experience or background meets the University’s General Entry Requirements

Particular degrees may also require you to sit a Special Tertiary Admissions Test. Visit utas.edu.au/courses or utas.edu.au/apply for further details.
